Step 4 the Safety Relay for the Light Curtain is AM The Safety Relay for the Stop Circuit is MM

GSR Safety Relay - Programming

Step #4 – Set Rotary Dial to “MM” or “AM”

Table 5 - CI and SI Logic Switch

Position	Function
0	Start configuration
MM	Monitored manual reset
AM	Automatic/manual reset

Step 5

GSR Safety Relay - Programming

Step #5 – Cycle Power “Off” then “On”

Helpful Hints

Helpful Hints – 440R Safety Relays

- Adjust the rotary switches gently and do NOT turn past the mechanical stops.
- If the rotary switch is changed to a different position on a programmed relay after power is removed, the relay will fault upon power up.
- Make sure to perform the cycling power Step #5 within 5 minutes of setting the rotary switch or relay will fault out.
